

Westinghouse Frequency Update Instructions

The following process takes up to 5 minutes to complete.

Before commencing you need to be aware of the beam that your radio is currently logged onto. This is indicated on the display panel of the Westinghouse satellite phone.

If your Westinghouse device does not display the beam number, please complete the following:

1. Press RCL,
2. Press FCN.
3. The display will now show the Beam the radio is currently logged onto. Press CLR to exit.

Find the beam number that your device is logged onto in the list below. The CFC and PFC listed beside your beam number are the frequencies that need to be entered into your radio.

BEAM	CFC	PFC
1	1558053000	1558062000
2	1558089000	1558098000
3	1558113000	1558122000
4	1550150000	1550050000
5	1558173000	1558182000

You are now ready to update your Westinghouse Satellite Radio.

1. Press Menu and then the RCL key. You will be prompted to enter a password. Enter "1234" then "STO".
2. Press the up or down arrow until you see "Admin Man Freq"
3. Press the RCL key.
4. The display will read "AreUSure". Press the up or down arrow until you see "Yes" press STO.
5. The display will read "CFC #". Enter the appropriate CFC number for the Satellite and Beam. Press STO.
6. The display will read "PFC #". Enter the appropriate PFC number for the Satellite and Beam. Press STO.
7. The unit will display "Srch For Sat Chan" and then "Sat Chan Found" and then "Power On".

Leave the Westinghouse powered on for 5 minutes. After the 5 minutes, dial 611 to perform a free test call to Customer Support.

If the "test call" fails, the security access key (SASK) has possibly become corrupted and a new one needs to be generated. Contact customer service at 1-800-216-6728 and they will generate a new SASK and help you re-commission your radio.

***** Please note, all talk group labeling will be lost after performing the frequency update.*****

Contact Customer Support at 1-800-216-6728 if you have any issues.
